01.

Website Health Overview

A snapshot of the website today. Record baseline results here, then update the same measurements after improvements are made.

[OVERALL HEALTH]

[ASSESSMENT]

[OVERALL STATUS]

[2-3 sentence summary of the current website condition, most important risk, and biggest improvement opportunity.]

02.

Technical + Accessibility

Issue counts, severity, and evidence. Use the same testing scope and methods when comparing baseline and follow-up results.

[ISSUE DISTRIBUTION]

CRITICAL	WARNINGS	MINOR
[COUNT]	[COUNT]	[COUNT]
[BEFORE / AFTER]	[BEFORE / AFTER]	[BEFORE / AFTER]

[TOP FINDINGS]

ISSUE / WCAG REF	SEVERITY	PAGES	STATUS / NEXT STEP
[Issue description]	[Level]	[##]	[Fix / verify]
[Issue description]	[Level]	[##]	[Fix / verify]
[Issue description]	[Level]	[##]	[Fix / verify]
[Issue description]	[Level]	[##]	[Fix / verify]

[TESTING NOTES]

Tools: [crawler] / [automated accessibility checker] / [manual keyboard and screen-reader checks]. Automated tests do not prove WCAG or ADA compliance.

03.

Priority Action Plan

Turn findings into a focused plan. Rank each fix by user impact, estimated effort, and the ability to verify the result.

[RECOMMENDED FIXES]

#	RECOMMENDATION	IMPACT	EFFORT	STATUS
01	[Action / affected pages]	[H/M/L]	[H/M/L]	[Planned]
02	[Action / affected pages]	[H/M/L]	[H/M/L]	[Planned]
03	[Action / affected pages]	[H/M/L]	[H/M/L]	[Planned]
04	[Action / affected pages]	[H/M/L]	[H/M/L]	[Planned]
05	[Action / affected pages]	[H/M/L]	[H/M/L]	[Planned]
